

Mohamed Marwen Maalawi

Senior Full-Stack Software Engineer

mohamedmarwen.maalawi@gmail.com • Tunis, Tunisia • github.com/marwenmaalawi • linkedin.com/in/mohamed-marwen-maalawi

PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer specialized in designing, developing and delivering production-grade web, mobile and SaaS applications. Strong expertise in NestJS, Next.js, React Native and Spring Boot. Experienced in scalable platforms, distributed systems, financial integrations, e-commerce solutions, workflow automation and AI-powered features. Worked across the full software lifecycle — from business analysis and architecture to deployment automation and production support. Known for fast execution, technical ownership, strong autonomy and a production mindset.

PROFESSIONAL EXPERIENCE

NUMERYX TUNISIA

June 2025 – Present

Software Engineer

- Design and development of Spring Boot microservices for distributed architectures
- Implementation of Camunda BPM workflows for complex business process automation
- GraalVM integration for high-performance script execution systems
- Performance optimization and error recovery mechanisms in production environments
- Keycloak integration for enterprise-grade RBAC, SSO and identity management
- Architecture discussions and technical decision-making for production systems

Technologies: Spring Boot • Java • Camunda BPM • GraalVM • Keycloak • Docker • Microservices

LUDDITECH INC

January 2023 – April 2025

Full-Stack Engineer

- Development of SaaS platforms and mobile applications serving international clients
- Real-time communication systems, chat systems and push notification infrastructure
- Stripe payment integrations including subscriptions, webhooks and billing management
- QuickBooks financial synchronization and accounting data integration
- AI feature integrations for enhanced product capabilities
- CI/CD pipeline improvements and deployment automation
- International remote collaboration across distributed engineering teams

Technologies: NestJS • React Native • Angular • Stripe • QuickBooks • Docker • GitHub Actions • CI/CD

Freelance

2024 – Present

Full-Stack Software Engineer

- End-to-end product development for clients across multiple industries
- NestJS backend architectures with PostgreSQL and scalable API design
- Next.js and React frontend applications with modern UX standards
- React Native mobile applications for iOS and Android
- Docker containerization and production deployment strategies
- CI/CD pipeline setup and automation
- Technical and architecture consulting for product teams

Technologies: NestJS • Next.js • React • React Native • PostgreSQL • Docker • TypeScript

TECHNICAL SKILLS

BACKEND & ARCHITECTURE

NestJS • Spring Boot • Node.js • Java • TypeScript

DATABASES

PostgreSQL • MySQL • MongoDB • NoSQL • Redis

TOOLS & METHODOLOGIES

Stripe • QuickBooks • Keycloak • Camunda BPM • GraalVM • Meta Pixel • Google Analytics

FRONTEND & MOBILE

Next.js • React • Angular • TypeScript • TailwindCSS • React Native • Expo

CLOUD & DEVOPS

Docker • GitHub Actions • CI/CD • Vercel
